

## turbo® II MAX

Development of the original turbo II® pre-cleaner with increased air intake area, increased rain protection and harder paint. The engine's intake air activates the pre-cleaner's mechanical cleaning. No other connections needed. No maintenance required. Lifetime warranty on the cleaning spinner.

Our latest turbo® II MAX precleaner is definitely the best on the market for the worst weather conditions - it has an extended, robust steel cover, providing unbeatable protection against heavy rain and snow. It doesn't just work in the harshest environments - it was built for them.

Leveraging our Trademark "Top Down" airflow design found in our turbo® II line, the turbo® II MAX is larger and features a hexagonal screen that offers 2 times the debris-blocking surface area when compared to the turbo® II, double the protected air intake!

Keep dirt, debris, dust and water away from your engine. Turbo® II MAX is designed for graders, mixers, loaders, haulers, crushers, dump trucks, mining equipment and more. Anywhere a high level of protection is needed and where dust, debris and the weather conditions are a major issue, Turbo® II MAX is a must-have with market-leading high efficiency and low restriction, it compares favorably to any other pre-cleaner."
