

turbo® Hybrid

The original precleaner. The engine's intake airflow activates the precleaner's mechanical cleaning action. No additional connections required. Maintenance-free. Lifetime warranty on the cleaning spinner.

turbo® Hybrid is built to perform in the toughest environments, day after day. Its advanced design delivers cleaner intake air, helping extend engine life and reduce downtime by preventing micro-abrasive dust from reaching critical engine components. Based on proven precleaner technology, turbo® Hybrid is a modern solution for today's demanding equipment.

By combining robust metal construction with durable industrial polymer, turbo® Hybrid offers the ideal balance of strength, reduced weight, and corrosion resistance. High efficiency and low restriction across the range make it a reliable choice for operators worldwide.

From loaders and graders to crushers, dumpers, mixers, and mining equipment—wherever dust is a challenge and engine protection matters, turbo® Hybrid delivers.
